(54) Title: OPERATIONAL AMPLIFIER

(57) **Abstract:** The invention relates to an operational amplifier. In order to enable an improved reduction of the output offset voltage of the operational amplifier, the operational amplifier comprises means S, T for introducing an additional current I_c to an internal node A of the operational amplifier for reducing the output offset voltage of the operational amplifier. The invention relates equally to a method for reducing the output offset voltage of an operational amplifier. This method comprises introducing an additional current I_c to an internal node A of the operational amplifier.
